Implementation of the Small E-Pas Program for Fishermen in the Work Area of the Airport Office and the Port Authority of Lhokseumawe City

Nurul Fitria, Fidhia Aruni, Muhaddis, Rabiatal Adawiyah, Ana Zahara

597--606

Public Perceptions of Personal Data Security in Digital Service Utilization in Indonesia and Thailand: A Comparative Analysis of Regulatory Frameworks, Risks, and User Trust

Ar Rahiim Innash, Arista Candra Irawati , Vicentius Simon Suyanto, Sudijono Sastroatmodjo, Prattana Srisuk

607-622

Praxiologial Ethics and Sense of Crisis in Risk Transformation in Handling Natural Disasters in Aceh 2025

Yasef Firmansyah, Fidhia Aruni, Rahmat Salam, Andriansyah

623-632

We are pleased to present Volume 4, Number 8 (August 2026) of the International Journal of Applied and Scientific Research (IJASR). This issue reflects the journal's continuing commitment to disseminating multidisciplinary scientific knowledge that addresses contemporary challenges and contributes to the improvement of society and human welfare.

The August 2026 issue brings together five research articles covering important topics in public administration, digital governance, environmental conservation, disaster management, and maritime policy. The diversity of these studies demonstrates the multidisciplinary character of IJASR and highlights the importance of integrating scientific perspectives with practical solutions to address complex social and environmental challenges.

The first article, "Collaborative Governance in Reducing the Rate of Domestic Violence (Case Study on the Social Service, Women's Empowerment and Child Protection of North Aceh Regency)," examines collaborative approaches involving relevant institutions in addressing domestic violence. The study emphasizes the importance of coordination and cooperation among stakeholders in strengthening protection mechanisms and improving responses to domestic violence within the community.

The second article, "Public Perceptions of Personal Data Security in Digital Service Utilization in Indonesia and Thailand: A Comparative Analysis of Regulatory Frameworks, Risks, and User Trust," explores public perceptions of personal data security in the increasingly digitalized service environment. By comparing Indonesia and Thailand, this research provides valuable insights into regulatory frameworks, digital risks, and the role of user trust in the adoption and utilization of digital services.

The third article, "Implementation of Policies for the Conservation of Protected Forests in Tenggulun Village, Tenggulun District, Aceh Tamiang Regency," focuses on the implementation of environmental conservation policies in a local context. The study highlights the challenges associated with protected forest management and the importance of effective policy implementation and stakeholder involvement in maintaining forest sustainability.

The fourth article, "Praxiological Ethics and Sense of Crisis in Risk Transformation in Handling Natural Disasters in Aceh 2025," addresses disaster management from an ethical and risk-transformation perspective. The article provides an important reflection on how ethical considerations, crisis awareness, and institutional responses can contribute to more effective approaches to managing natural disasters, particularly in regions vulnerable to hydrometeorological hazards.

The final article, "Implementation of the Small E-Pas Program for Fishermen in the Work Area of the Airport Office and the Port Authority of Lhokseumawe City," examines the implementation of a policy program designed to support fishermen. The study contributes to discussions on public service implementation

and the development of policies that can improve administrative access and support for communities whose livelihoods depend on the maritime sector.

Taken together, the articles in this issue demonstrate how research can provide evidence-based perspectives for improving governance, protecting vulnerable communities, strengthening environmental sustainability, managing disaster risks, and supporting public services. These contributions are particularly relevant as societies face increasingly interconnected challenges arising from technological development, environmental change, social vulnerability, and the need for responsive public institutions.

We would like to express our sincere appreciation to all authors who contributed their scholarly work to this issue. We also extend our gratitude to the reviewers and editorial team whose careful evaluation and constructive recommendations have supported the quality of the published articles. The peer-review process remains an essential component of maintaining the academic integrity and scholarly standards of IJASR.

We hope that the research presented in this issue will be useful to academics, researchers, practitioners, policymakers, students, and other readers interested in multidisciplinary scientific inquiry. We also encourage researchers from diverse disciplines and geographical backgrounds to continue contributing innovative and evidence-based research to future issues of IJASR.

Finally, we invite our readers to explore the articles in this issue and engage with the findings, perspectives, and recommendations presented by the authors. May this issue contribute meaningfully to the advancement of scientific knowledge and its practical application for the benefit of society.

Happy Reading
