The Effectiveness of the Implementation of an Online-Based New Student Admission System at SMA Negeri 2 Percut Sei Tuan

Husniyyah Zahra, Fidhia Aruni, Syukri, Rabiatul Adawiyah 633-640

The Effectiveness of the Implementation of the Free Nutritious Meal Program (MBG) at SMA Negeri 1 Ranto Peureulak East Aceh

Ayu Mastura, Syukri, Rudi Kurniawan, Rabiatul Adawiyah 641-648

Implementation of Public Order Policy in the Perspective of Street-Level Bureaucracy by the Police Unit of Pamong Praja and Wilayatul Hisbah of Lhokseumawe City

Dimas Ardiansyah, Syukri, Fidhia Aruni, Rabiatul Adawiyah 649-656

Implementation of E-Billing Digital Payment System on Port Service Memorandum at Lhokseumawe City Port (Case Study at PT Pelindo Lhokseumawe Branch Port)

Zihan Enjel Leka, Muhaddis, Rabiatul Adawiyah, Syukri 657-664

The Implementation of Public Services Based on Good Governance Principles: A Study at the Public Works and Public Housing Office of Lhokseumawe City

Farhan Lazakasra, Muhaddis, Fidhia Aruni, Rudi Kurniawan, Dicky Armanda 665-674

Wearable Inertial Sensors for Field-Based Lower Limb Biomechanical Assessment in Soccer Players: A Systematic Review

Abriadi Muhara, Juhanis, Muslim, Hasmawaty 675-686

It is with great pleasure that we present Volume 4, Number 9 of the *International Journal of Applied and Scientific Research (IJASR)*, published in September 2026. This issue brings together a diverse collection of scholarly studies addressing contemporary challenges in public administration, digital transformation, education, health policy, sports science, and public service delivery. Consistent with the multidisciplinary mission of IJASR, the articles presented in this issue demonstrate how scientific inquiry can contribute to practical solutions and improved human welfare.

The issue opens with a study examining the effectiveness of an online-based new student admission system at SMA Negeri 2 Percut Sei Tuan. The study highlights the growing importance of digital systems in improving the accessibility, efficiency, and effectiveness of educational administrative services. Digital transformation in education is increasingly essential to ensure that public services respond to the needs of students, parents, and educational institutions in a transparent and efficient manner.

The second article presents a systematic review of wearable inertial sensors for field-based lower-limb biomechanical assessment among soccer players. This study demonstrates the increasing role of technology and data-driven approaches in sports science. The application of wearable technology provides promising opportunities for more objective assessment of movement, performance, and biomechanical conditions, thereby supporting evidence-based approaches to athletic training and performance improvement.

Digital transformation is also explored through the study of the implementation of an e-billing digital payment system for port service memoranda at the Port of Lhokseumawe. The research illustrates how digital payment systems can support administrative efficiency, transparency, and accountability in port services. Such technological innovations are particularly relevant in modernizing public and business services while reducing administrative barriers and improving service processes.

Another important contribution in this issue examines the effectiveness of the Free Nutritious Meal Program (Makan Bergizi Gratis/MBG) at SMA Negeri 1 Ranto Peureulak, East Aceh. The study reflects the importance of public policy interventions in supporting student welfare and improving access to adequate nutrition. Nutrition-related programs in educational settings have broader implications for student health, learning readiness, and the development of human resources.

The issue further presents a study on the implementation of public services based on good governance principles at the Public Works and Public Housing Office of Lhokseumawe City. This research emphasizes the significance of accountability, transparency, effectiveness, and responsiveness in the delivery of government services. Good governance remains a fundamental element in building public trust and ensuring that government institutions effectively address community needs.

Finally, this issue includes research examining the implementation of public order policy from the perspective of street-level bureaucracy by the Police Unit of Pamong Praja and Wilayatul Hisbah of Lhokseumawe City. The study provides insight into how public policies are translated into practice by frontline government actors. It highlights the complex relationship between policy implementation, institutional responsibilities, and interactions between public officials and communities.

Taken together, the articles in this issue illustrate the broad and interconnected nature of applied and scientific research. From digital education systems and wearable sports technology to public nutrition programs, digital payment systems, good governance, and public order policies, these studies demonstrate the importance of research that connects scientific knowledge with real-world challenges.

We hope that the findings and perspectives presented in this issue will contribute meaningfully to academic discourse and provide practical insights for researchers, educators, policymakers, government institutions, practitioners, and other stakeholders. We also hope that these contributions will encourage further interdisciplinary research and collaboration in addressing emerging challenges at local, national, and international levels.

We sincerely express our appreciation to all authors, reviewers, editors, and contributors whose dedication and scholarly efforts have made the publication of this issue possible. We are equally grateful to our readers for their continued interest and support of the *International Journal of Applied and Scientific Research*.

May this issue serve as a valuable source of knowledge and inspiration for advancing research, innovation, effective public services, and sustainable human development.

Happy Reading
